Email: nath93266@gmail.com

Phone: +91 9072180063 | Location: Thiruvananthapuram, Kerala, India

Professional Summary

Results-driven Full Stack Developer with expertise in designing and developing scalable web applications and delivering client-focused software solutions. Proficient in debugging, performance optimization, and agile methodologies to drive system efficiency and impactful outcomes. Skilled in front- end and back-end technologies, API integration, and cloud-based deployments.

Technical Skills

- **Backend Technologies** : Java Spring Boot, Node.js, Express.js, Django, Rest API, Fast API
- **Frontend Technologies** : React.js, Next.js, TypeScript, HTML, CSS, Bootstrap, Tailwind CSS, JavaScript
- **Database** : MongoDB, MySQL, Supabase
- **Deployment** : AWS (EC2, S3), Docker,
- **Programming Languages** : Java, JavaScript, Python, C
- **Soft Skills** : Team Leadership, Agile Development, Attention to Detail
- **Version Control** : Git

Work Experience

Full Stack Developer I

Simplita AI Technologies Private Ltd. (Villupuram, Tamil Nadu) | April 2025 - Present

- Developed AI-powered automation platforms to enhance business decision-making.
- Collaborated in an Agile Scrum environment to deliver user-focused features on time.
- Collaborated with cross-functional teams to integrate AI solutions into existing systems.
- Improved data processing efficiency, reducing computational costs and enhancing performance.

MERN Stack Developer Intern

ZedSoftTech (Tirur, Malappuram) | December 2024 - April 2025

- Developed a MERN stack e-commerce platform for selling customizable admin panels to businesses.
- Creating a feature-rich admin panel using React with TypeScript to offer modular and scalable solutions tailored to client needs.
- Designing an intuitive, responsive UI/UX with Tailwind CSS, ensuring user-friendly interactions and modern aesthetics.
- Building a robust backend using Node.js and Express, integrated with MongoDB for seamless data storage and management.
- Implementing dynamic features for admin panel customization, enabling businesses to configure panels based on specific requirements.
- Optimizing application performance through rigorous testing, debugging, and efficient database queries.
- Collaborating with cross-functional teams in an Agile environment, ensuring timely delivery of high-quality solutions

Freelance Software Developer

February 2022 - April 2025

- Developed custom solutions using the MERN stack and Python Django for various clients, focusing on web applications, API development, and system integrations.
- Delivered end-to-end projects, including design, development, testing, and deployment.
- Collaborated with clients to understand requirements, ensuring high-quality, user-friendly, and scalable solutions.
- Worked on projects involving real-time data handling, authentication systems, media handling, and database management.
- Technologies used: JavaScript, React, Node.js, Express, MongoDB, Python, Django, AWS, Cloudinary.

Education

Bachelor of Technology in Computer Science and Engineering

Vidya Academy Of Science And Technology Technical Campus | November 2021 - April 2025

- Academic Achievements : 86% aggregate.

Certifications and Trainings

Web Development Training

Internshala Trainings | September 2022 – October 2022

- Completed an 8-week program on HTML, CSS, Bootstrap, PHP, React, and DBMS.
- Scored 62% in the final assessment.

React Developer Certification

Udemy | Completed 2024

- Advanced coursework in React Hooks, state management, and frontend optimization.
- Built modular and reusable components to improve code maintainability and scalability in React applications.
- Gained expertise in API integration with Axios, implementing optimized data fetching techniques.
- Proficient in debugging and performance optimization using React DevTools and browser-based debugging tools.

Projects

[Simplita.ai ↗](#)

April 2025 - Progress

- Engineered a secure vulnerability detection engine for Simplita AI, reducing application security risks by 40% and ensuring compliance with OWASP Top 10 standards.
- Developed and optimized 50+ Simplita CLI commands, improving developer productivity.
- Collaborated with cross-functional teams to enhance system architecture, improving platform performance by 35% and ensuring scalability.

[EchoStorm Mock Server and API tester ↗](#)

October 2025 - Progress

- API Testing Suite - Built comprehensive Postman-like API testing tool with collections, environments, and request history
- Real-time WebSocket Relay - Implemented localhost API testing from production using WebSocket coordination architecture
- Zero-Configuration Localhost Testing - Engineered smart localhost detection with automatic CORS/mixed-content handling
- Multi-tab Interface - Designed responsive UI with tabbed navigation for managing multiple API requests simultaneously
- Script Execution Engine - Integrated pre-request/post-response scripting with Postman-compatible pm API and assertions

[KEAM Mock Entrance Web ↗](#)

June 2024

- Developed a React-based mock entrance exam platform with subject-specific quizzes and a real-time timer, attracting over 200 participants in 2024 and 300+ participants in 2025.
- Optimized the platform for scalability, enabling it to handle concurrent users without lag.

[Complaint Management System ↗](#)

September 2022 - November 2022

- Designed and implemented a comprehensive complaint management system for college use, leveraging React.js and Tailwind CSS.
- Provided features for real-time tracking, complaint submission, and admin management, improving resolution efficiency by 30%.

[Find My Client ↗](#)

July 2024 - August 2024

- Designed an AI Powered MERN stack app for connecting skilled Workers with clients, enabling 100+ successful hires in 2 months.
- The platform enables professionals to showcase their expertise by posting images and content related to their work
- Users can connect with other professionals, follow profiles, and expand their network, fostering a dynamic professional community.
- Integrated Cloudinary for media uploads, reducing media load times by 40%.

[AI Powered Virtual Hospital ↗](#)

December 2024 - March 2025

- It is an innovative platform that allows users to book appointments with doctors from any department across India.
- Features an AI assistant to answer health-related queries, helping users make informed decisions.
- Integrated Cloudinary for media uploads, reducing media load times by 40%.

[Medical Appointment System ↗](#)

September 2023 - November 2023

- Developed a Django-based appointment system managing bookings, with automated email reminders improving booking retention by 20%.
- Conducted debugging to enhance cross-device compatibility and reduce errors by 50%
